

# What is CD200 Privacy USB?

- **Solution for application and website content copy protection.**
  - How to prevent offline website content from being copied?
- **CD200 Privacy USB can save the data into the CD-ROM partition of USB and hide it. It can't not be copied by Windows Explorer and limit access.**
- **The feature is that it can be applied to application or HTML file formats, or other file formats inline in HTML. (It's only applicable to Windows OS.)**

# How to work?

1. Make a shortcut of application or index HTML
2. Create an ISO file of DVD with hiding directories of data
3. Build a source USB by CD200 Privacy USB tool.
4. Mass production by write protection series duplicator
